

2016 Iowa Farm Custom Rate Survey

Many Iowa farmers hire custom machine work in their farm business, or perform custom work for others. Some farmers rent machinery or perform other services. The information below is based on a survey of 182 Iowa farmers, custom operators, and farm managers. Eighteen percent of the respondents perform custom work, 14 percent hire work done, 43 percent indicated doing both, 3 percent indicated doing none, and 22 percent did not indicate whether they perform or hire custom work.

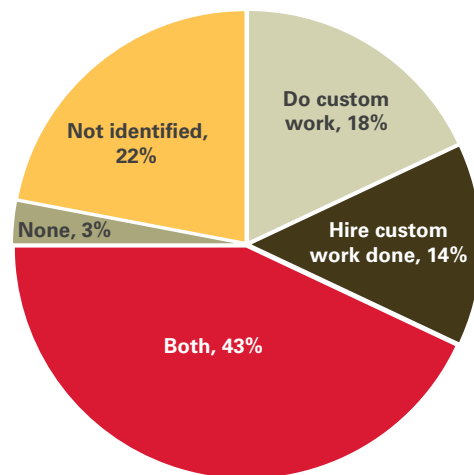

For each operation, the average rate from the survey, the median, the range, and the responses are shown. The average is calculated as the simple average of all responses. The median is the response that splits all the ordered responses (from smallest to largest) in half. The reported range consists of the second-lowest value and the second-highest value in the sample.

The values in the table below are rates expected to be charged or paid, including fuel and labor. The average price for diesel fuel was assumed to be \$2.00 per gallon. This rate schedule is intended only as a guide. Actual custom rates may vary according to availability of machinery in a given area, timeliness, operator skill, field size and shape, crop conditions, and the performance characteristics of the machine

being used. Rental rates for some machinery items are shown in the last section of this report, along with a worksheet for estimating rental rates on other items.

Note: All rates include fuel, repairs, depreciation, interest, labor, and all other machinery costs for the tractor and implement.

Estimating a Machinery Rental Rate for Items Not Surveyed

Example:
Tandem Disk

The following worksheet can be used to estimate a rental value for equipment items not shown above.

1. Custom charge (includes labor, fuel, tractor)	\$ _____/acre	\$14.25
2. Percent of custom charge that is for interest, insurance, depreciation, and repairs (excluding fuel and labor) (use 60% for tillage, 65% for planting and harvesting)	x _____%	x 60%
3. Rental value, including tractor (1 x 2)	= \$ _____/acre	= \$8.55
4. Tractor rental value, if tractor is not provided: _____ HP x \$ _____ per hp-hour rental rate (see above) / _____ acres/hour ^{1/} =	= - \$ _____/acre	= - \$2.18
Ex: 150 HP x \$.22 (per hp-hour rental rate) / 15 acres/hour = \$2.18		
5. Implement rental value, without tractor (3 minus 4)	= \$ _____/acre	= \$6.37/acre

^{1/} Typical values for acres covered per hour can be found in AgDM File A3-24, [Estimating the Field Capacity of Farm Machines](#)
