

# **Solar Energy in Agriculture: Considerations for Investing in Solar Systems**

**Wednesday, July 25**

**6:30 p.m. - 8:30 p.m.**

**Jeff McAfee Farm**

**1489 Road 2 - Leigh, NE**

**Coming from the North on Highway 91, turn south on Road 3 and go 8 miles, turn west on Road 0 and go 1 mile, then turn south on Road 2 and go 1/8 mile**

**Coming from the South on Highway 30, turn north on Road 3 and go 10 miles, turn west on Road 0 and go 1 mile, then turn south on Road 2 and go 1/8 mile**

**(Site is located on West side of road)**

## **Presented By:**

**F. John Hay, Department of Biosystems Engineering, University of Nebraska -Lincoln  
Clay Gibbs, Cornhusker Public Power District**

## **Who Should Attend:**

**This seminar is open to the public. The seminar will focus on applications of solar PV for farms, ranches, and rural businesses. We will mainly discuss grid tied solar PV, economics, basic design considerations and feasibility. Participants will learn about economic considerations such as payback, grants, tax credits, and depreciation.**

## **No Cost to Attend**

**Please pre-register by contacting Nebraska Extension in Colfax County at  
402-352-3821 or email [colfax-county@unl.edu](mailto:colfax-county@unl.edu)**
