\*Adjusted yield formula = average of the two nearby checks compared to the total average of all the check hybrids (231.1 bu in this trial), then adjust the corn hybrid yield accordingly.

Plot Hybrid Yield Spread = 232.9 bu/ac to 266.1 bu/ac = 33.2 bu/ac (last year - 57.7 bu)

Check Hybrid Yield Spread = 229.5 bu/ac to 236.9 bu/ac = 7.4 bu/ac (last year - 23.6 bu)

Stalk rot and plant population counts taken on 9-20-2017; plant populations not reported on all check plots but were very consistent.
